

# No matter what color Triarch finish you choose, it's green.

With unmatched color, performance, and texture possibilities, Triarch offers you a limitless palette of interior design options. But we also offer you the comfort and confidence of knowing that our finishes are environmentally responsible.

Our state-of-the-art, environmentally friendly coatings offer superior performance over conventional wall coverings like paint and vinyl wall paper, with far greater aesthetic value. Unlike most traditional wall coverings, Triarch products come with a performance warranty against fading, discoloration and surface mold or mildew growth.

## Environmental awareness is built in.

We engineer our finishes to have as little impact on the environment as possible. Triarch products

- are vapor permeable for better indoor air quality
- can be recoated or refinished during remodeling, eliminating the need to remove existing product
- are ammonia free
- have zero formaldehyde content, and zero formaldehyde emissions
- are very low in VOCs (significantly less than federal limits)

## Environmental stewardship drives our decisions.

Saying you're green is one thing. Proving it is another.

- We've reformulated our products and reduced glycol content, further reducing VOCs.
- We redesigned our sample presentation units, greatly reducing the amount of energy needed to produce them.
- By expanding our manufacturing, we've consolidated shipments resulting in saved energy and fossil fuel.

## Others recognize our commitment to the environment.

Our interior finishes are recognized as environmentally friendly by a number of third parties.

- We earned SCS Indoor Advantage™ Gold Listing for Duroplex®. To learn more about this listing, visit [scscertified.com](http://scscertified.com).
- We earned CHPS (Collaborative for High Performance Schools) Listing for low emitting materials table for Duroplex. You can learn more at [chps.net](http://chps.net).
- Triarch products qualify for USGBC LEED credit with EQ4.2 (paints and coatings). More information about LEED can be found at [usgbc.org/leed](http://usgbc.org/leed).
- We are the only manufacturer in our class to be ISO 9000 and ISO 14000 certified. Visit [iso.org](http://iso.org) to learn more.

## Style with substance.

It's clear why the most creative, discerning, and environmentally aware interior designers have been choosing Triarch interior finishes for more than 20 years. Learn more about us at [triarchinc.com](http://triarchinc.com).
